

4 PANELS

FIBC BAG

They are made with four individual pieces inserted to form a square structure. When filled, a 4-panel bag maintains its square shape similar to other types of construction. Typically, 4-panel bags hold their shape better than U-panel bags.

- Sugar
- Flour
- Starch
- Wheat
- Powdered milk
- Spices
- Cement
- Sand
- Waste materials

WHAT IT IS?

It is a kind of FIBC which uses 4 separate fabric panels to make a square bag. It can be occupied in packaging industry. It has different:

- Types of Loops
- Openings for loading
- Types of unloading

TYPES

They can be divided on the basis of their filling and discharge systems:

- Open bottom
- Open mouth
- Flat bottom
- Conical bottom
- Conical skirt and cover
- Discharge valve
- Loading valve

APPLICATIONS

In industry sectors such as: Manufacturers of chemicals, food, construction, agriculture and industrial applications.
