

# BAFFLE

FIBC BAG

## WHAT IT IS?

These are flexible polypropylene containers; dimensions are measured by filling capacity, ranging from 1102.31 lbs. to 4409.245 lbs. in general. They have handles of the same material at the top to facilitate transportation. Their function is basically to help the bag maintain its square or rectangular shape.

## TYPES

They can be divided on the basis of their filling and discharge systems:

- Open bottom
- Open mouth
- Flat bottom
- Conical bottom
- Conical skirt and cover
- Discharge valve
- Loading valve

## APPLICATIONS

In industry sectors such as:

Food - Household - Chemical Industry - Apparel

They are designed with filling and unloading systems of various types, each one special for the material it contains, and have lugs on the upper part to allow their transport.

They are moisture and shock resistant, recyclable, biodegradable, disposable and antistatic.
