

U PANEL

FIBC BAG

It has less vulnerable points at the bottom of the bag. Vertical side seams give the item a square appearance. It is good for sieving fine items; dust proof; moisture resistant; leak proof and can resist acid corrosion.

WHAT IT IS?

They are made with three central panels. One that runs the length of the bag forming the bottom and two additional pieces of fabric sewn into the larger piece that form the other two sides. The U-panel construction has two seams sewn along the two opposite sides to create two panels, creating a "U" panel shape.

TYPES

They can be divided on the basis of their filling and discharge systems:

- Open bottom
- Open mouth
- Flat bottom
- Conical bottom
- Conical skirt and cover
- Discharge valve
- Loading valve

APPLICATIONS

In industry sectors such as:

- Food of animal origin
- Sugar
- Cement
- Construction
- Fertilizer
- Grains and seeds
- Flour
- Metal
- Plastic
- Powders
- Salt and sulfates
